RUN

DARWIN – AYERS ROCK – DARWIN

Australia's very first **Cannonball Run** will be staged on the world class all-bitumen highways of the Northern Territory next May.

The event will be the most exotic motoring challenge ever held in this country and is open to enthusiasts with a sports car, supercar or high performance car which meets the requisites of the **Cannonball** Selection Committee.

From Australia and around the world, a field of Ferraris, Lamborghinis, Lotus Esprits, Maseratis, Porphes, Corvettes, Mustangs, BMWs, Jaguars, Mercedes, Holden Special Vehicles, GT Falcons, Mazda RX7s, Honda NSXs, and many more makes and models of sports cars have signed on to compete for the **Cannonball** Title and Prizemoney.

In the great tradition of the original **Cannonball Run** staged between Los Angeles and New York, the inaugural Australian Run will start in the sophisticated Northern Territory port city of Darwin with it's five star hotels, casino, and glittering harbour. Cannonballers will compete through timed control sections, open speed sections on closed highway, and in The Flying Mile Challenge in which **Cannonballers** can take their cars up to maximum speed on a closed highway.

The Northern Territory **Cannonball Run** is being meticulously planned under the auspices of the Confederation of Australian Motorsport (CAMS), the Government of the Northern Territory, and Australian motorsport veteran Mr Allan Moffat.

From Darwin to Ayers Rock and back to Darwin for the finish, the Run takes in some of the most spectacular scenery on the Australian continent including Katherine Gorge, The Devils Marbles, the MacDonnell Ranges, Ayers Rock and the Olgas.

All this on high quality all-bitumen highways which carry no speed limits in most parts!

If you own a sports car or high performance car, don't miss this one!

The Northern Territory **Cannonball Run** - May 22nd to May 27th. Entry Fees \$7500.00 (AUD) inclusive of meals and accommodation. For information and application forms phone 008 812 824 or write to:
